

# HEAD MEASUREMENT TAPE

Please print this page in order to create a head measuring tape to determine your correct helmet size. Please note that the following head measurement determines proper fit for **SHOEI** and **HJC** helmets.

To measure your correct helmet size, print this page, cut along dotted lines and paste matching arrows. Use this measuring tape like a headband to measure the circumference of your head just above the eyebrows and above the ears. Your helmet should fit comfortably with even pressure around your head, approximately 1.5 to 2.5 cm (1 inch) above the eyebrows.
